John Deere Quality Diesel Fuel Conditioner and Oil

Diesel Fuel System Tune-Up

To save fuel, have our technicians:

- Recondition or replace your fuel injectors. Injectors should be tested every two years.
- Change fuel filters on your fuel storage tanks to prevent premature tractor filter replacement.
- Replace fuel filters on your equipment.

John Deere Premium Diesel Fuel Conditioner

Enhance fuel quality and protect the fuel systems in your diesel-powered equipment, use John Deere Premium Diesel Fuel Conditioner (DFC). For complete mixing, install DFC when your storage fuel tank is being filled.

John Deere Engine Oil Can Save You . . .

- 50-80%* of your time changing oils and filters.
 - 50-80%* of your filter costs.
 - 50-80%* on your waste oil and filter disposal costs.
 - 50-80%* on your engine oil costs.
- *50-80% based on OEM oil drain intervals of 100, 200, and 250 hours. All extended to 500 hours with John Deere Filter.

For additional savings and convenience, take advantage of On Farm Bulk Oil Deliver of HyGard® and 15W40 II oils.
