Annual Service Inspection with \$500 Service Credit

We know how critical it is to have your combine performing at peak efficiency during crucial harvest windows. Having your combine fully inspected by a certified technician maximizes your chances of running productively. We will complete up to a 200 point inspection on your combine and give you a \$500 service credit to make any needed repairs found during the inspection.

Flex Head Inspection

Don't forget about the flex head! PEAK includes a flex head inspection. This will help you run faster and cut cleaner. To reduce transportation time and costs we can even schedule it in conjunction with your annual combine inspection.

Pre-Season Start-up

Make sure your combine is ready for optimum efficiency before you hit the field. A certified technician will come out and ensure your combine is set up correctly, calibrated, and ready for the field before the harvest season starts. We will ensure you have a complete understanding of your combines operation which will make for an easier harvest season.

Parts Priority

The right part fast, and at the right price. During the harvest season parts priority gives you free freight on any next day parts order. Just place your John Deere PDC order by 3PM for next day delivery. Parts Priority applies to machines with Peak Advantage agreement only.

Service Priority

When your machine is down, we will have a certified technician dispatched within 30 minutes upon your call. Service priority is offered during regular store hours and after hours support. After hours support fees may apply. Our Certified technicians will diagnose your problems and get you going as soon as possible.

Warranty Discount \$500 Purchase Credit

PEAK plans and extended warranties go hand in hand for total machine coverage. When you buy a Peak and a PowerGard or PowerPro plan on your combine we will give you a \$500 discount on the approved PowerGard or PowerPro purchase. Subject to terms and conditions of PowerGard and PowerPro warranty. Buy both for total protection and your biggest savings.

Precision Support \$250 Purchase Credit

You will receive a \$250 discount on your precision support PEAK plan when purchased with a combine PEAK plan.

Remote Support

Get the full potential out of your new equipment by utilizing the power of the telematics already installed on your machine. Remote Display Access gives our service team the ability to view your display no matter where you are to help answer any questions. With Service Advisor Remote, we can diagnose equipment remotely and provide timely solutions to keep you going with fewer service calls. Remote support is

available on machines with JDLink MTG and active subscription.

After Hours Support

Need someone to support your equipment purchase when you really need it? Our after hours support is the answer. We are ready to take your call in the planting and harvest season when down-time is crucial. You have access to parts and remote service support late in the evening, all week long, including weekends. After hours support fees apply, \$30 per part ticket and \$100 per service call deployed.

MYJD.com

Now you can access all your John Deere applications from one spot. Manage data, order parts, view machine performance and more. We will ensure you are set up to take advantage of MYJD.com and have appropriate access to your data.

AVAILABLE ADD-ONS:

Corn Head Inspection

Now that the combine and flex head are ready for the upcoming harvest, don't forget about the corn head! For an additional fee we offer a corn head inspection. This will help you run faster and cut cleaner. To reduce transportation time and costs we can even schedule it in conjunction with your annual combine inspection.

Machine Optimization

The next level to field startup. A Certified technician can fine-tune your equipment to minimize grain

loss and maximize grain quality. They will ride with during harvest until the machine is optimally set up for the field condition. They will also ensure that quality data is collected and saved or transferred wirelessly.

Crop Change Over

We will send a certified technician to change over heads from one crop to another. They will set up the combine and head to the appropriate settings along with setting up yield/moisture calibration. The technician will ride along during operation until combine & head are functioning correctly.

Clean Up

Done with harvest? Put your combine away clean and worry free. Keep the rodents out and components clean of any corrosive debris potentially causing premature failure and costly repairs that could have been prevented. Not only is our clean up cost-effective, it looks great too! To reduce transportation time and costs we can even schedule it in conjunction with your annual combine inspection.

Parts On Site

How many trips do you make to pick up filters, belts, and other regular maintenance items? Reduce your fuel costs and time spent running errands to town with a parts-on-site cabinet filled with the parts you need for the growing season. We will stock your cabinet specific to your equipment needs for you and keep it updated with any equipment updates you have throughout the season.
