Row Unit Inspection with \$500 Service Credit

We know how critical it is to have your planter performing at peak efficiency during crucial planting windows. Having your planter fully inspected by a certified technician maximizes your chances of running productively. We will inspect your row units and give you a \$500 service credit to make any needed repairs found during the inspection.

Pre-season Start-up

Make sure your planter is ready for optimum efficiency before you hit the field. A certified technician will come out and ensure your planter is set up correctly, calibrated, and ready for the field before the planting season starts. We will ensure you have a complete understanding of your planter's operation which will make for an easier planting season.

Service Priority

When your machine is down, we will have a certified technician dispatched within 30 minutes upon your call. Service priority is offered during regular store hours and after hours support. After hours support fees may apply. Our Certified technicians will diagnose your problems and get you going as soon as possible.

Parts Priority

The right part fast, and at the right price. During the planting season, parts priority gives you free freight on any next day parts order. Just place your John Deere PDC order by 3PM for next day delivery. Parts Priority applies to machines with Peak Advantage agreement only.

Remote Support

Get the full potential out of your new equipment by utilizing the power of the telematics already installed on your machine. Remote Display Access gives our service team the ability to view your display no matter where you are to help answer any questions. With Service Advisor Remote, we can diagnose equipment remotely and provide timely solutions to keep you going with fewer service calls. Remote support is available on machines with JDLink MTG and active subscription.

After Hours Support

Need someone to support your equipment purchase when you really need it? Our after hours support is the answer. We are ready to take your call in the planting and harvest season when down-time is crucial. You have access to parts and remote service support late in the evening, all week long, including weekends. After Hours Support fees apply, \$30 per part ticket & \$100 per service call deployed. Some restrictions apply.

MyJohnDeere.com

Now you can access all your John Deere applications from one spot. Manage data, order parts, view machine performance and more. We will ensure you are set up to take advantage of MYJD.com and have appropriate access to your data.

Precision Support \$250 Purchase Credit

You will receive a \$250 discount on your precision support PEAK plan when purchased with a planter PEAK plan.

AVAILABLE ADD-ONS:

Machine Optimization

Maximize your planter's performance by ensuring your planter is set up correctly as you start the planting season. One of our technicians will ride with you in the field to ensure your planter seed depth, seed spacing, downforce and section control timing is set correctly for optimal planting.

Meter Test

Want to ensure your meter units are tailored to your specific planting specifications? We can do that. We will put your meters on our test stand and calibrate them to your specific planting speed, seed population, and seed size. This will keep your skips and doubles to a minimum during planting for a better stand.

Parts On Site

How many trips do you make to pick up filters, belts, and other regular maintenance items? Reduce your fuel costs and time spent running errands to town with a parts-on-site cabinet filled with the parts you need for the growing season. We will stock your cabinet, specific to your equipment needs, and keep it filled and updated throughout the season.
