END110	110" x 72" End Cap White Plastic	<b>\$112.00 for box of 20 end caps</b>		

SunFilm Stretch film has incredible damage resistance allowing for excellent puncture, abrasion and tear resistance for outdoor storage, therefore eliminating extra storage and operational cost. The reflective white film reduces heat buildup, which avoids loss of quality feed and it is specifically treated to resist ultra light degradation for up to one year. It has excellent cling - wraps bales air tight for the duration of storage. In addition, it helps you to prevent attacks by bugs, mold and harmful bacteria.

All prices good from October 1, 2020 - December 31, 2020

**Recommendations for best results:**

- \*Film should be pre-stretched to 55% - 60%
- \*Bales are wrapped with a 50% overwrap and minimum of four layers (2x2)
- \*Wrap bales at a 50% - 60% moisture content for best results
